D. Remarks

1) This amendment is timely filed in accordance with 37 CFR §1.312 before the payment of the issue fee.

2) Figure 5, and the initial reference to it in the specification, are changed to correct two drawing errors. In the informal as-filed Fig. 5 a radial member 16 was labeled 18, which would erroneously suggest that the center pole was attached directly to the circumference of the support wheel. Moreover, no radial member was shown perpendicular to the plane of the figure, thus erroneously suggesting that only two radial members were attached to the support wheel. Adding a sectioned radial member and re-numbering the one that had been incorrectly labeled renders Fig. 5 consistent with the rest of the drawing (e.g., Fig. 6). These amendments are proposed as a matter of form that does not affect the scope of the invention.
